Information Resources and Literature Searching

Know Your Information Resources - 5 lessons

1. Scholarly and Reference Resources
2. Scholarly Resources - Journals
3. Indexes for journals
4. More about research articles
5. Resources - usage & context

Literature Searching - 8 lessons

6. Introduction to online indexes
7. Two fundamentals of online searching
8. Four principles of searching - Principle I
9. Principle - II
10. Principle - III
11. Principle IV
12. Four Principles - Exercises
13. Searching using Mesh

Introduction to Referencing

About References & Referencing – 3 lessons

1. Introduction to Referencing
2. Why we should reference
3. References - What-Where-How

More about Referencing – 3 lessons

4. Elements in referencing
5. Referencing styles
6. Preparing for citing and referencing

Reference Managers – 2 lessons

7. What are reference managers
8. Using reference managers - an introduction

Mastering PubMed

Before you use PubMed – 5 lessons

1. What exactly is PubMed
2. Exercises Four Principles
3. Understanding the results page
4. Result Display options
5. Creating NCBI Account

Focusing search results using MeSH - 9 lessons

6. Mesh Recap
7. Understanding the Mesh results page
8. Find the right mesh terms
9. Using the MeSH search builder
10. MeSH - Searching two terms
11. MeSH - Using subheadings
12. Using Subheadings for two MeSH Terms
13. Searching a topic with MeSH Terms
14. More topic searches

Narrow down search results - 4 lessons

15. Truncating search terms
16. Filters available
17. How a filter work
18. Combining filters

Other useful features in PubMed - 3 lessons

19. Verifying a citation
20. Trending articles
21. Latest literature

Saving your work - 3 lessons

22. Saving search strategies
23. Saving results offline
24. Emailing search results
25. Saving search results online

Mastering PubMed – Additional Learning

Filters – Advanced - 2 lessons

1. Selecting available filters
2. Creating custom filters

Dashboard – Advanced - 4 lessons

3. Customizing the dashboard
4. Customizing preferences
5. More with Saved Searches
6. More with Collections

Journals in NCBI databases - 4 lessons

7. Introduction and journal subsets
8. Search by journal title
9. Searching by subject
10. Filters

Advanced Search Page - 3 lessons

11. Elements in the Advanced search page
12. Simple Search Topic
13. History Search Details

Advanced Search Page for Detailed searches - 4 lessons

14. Planning the search steps
15. Carrying out the search
16. Downloading & documenting the search strategy
17. Limitations

Miscellaneous - 2 lessons

18. Batch Citation Matcher
19. Clinical Queries

Reference Management with Mendeley

Before you use Mendeley - 3 lessons

1. Introduction
2. Installing Mendeley
3. Web Desktop Overview

Populating Mendeley - 6 lessons

4. Creating folders
5. Populating Mendeley - Adding Manually
6. Adding existing PDFs
7. Using the web importer
8. Importing large results from PubMed
9. Importing large results from Cochrane Library

Browsing and Searching the Mendeley Library - 3 lessons

10. Adding Tags to enhance searching
11. Browsing the Library
12. Searching the library

Managing Duplicates - 3 lessons

13. About Duplicate Records
14. Check for Duplicates feature
15. Actions for Duplicates & Unique Items

Adding Citations and Bibliography in an article - 4 lessons

16. Adding Citations and Bibliography
17. Editing Citations
18. Changing Styles
19. Exporting your paper for submission

Miscellaneous – various options in Mendeley - 14 lessons

20. Literature Search
21. Elements in My Library
22. Groups
23. Recovering deleted items
24. PDFs and your Mendeley space
25. Finding Related Literature in your library
26. Watched folders

27. Export options
28. Copying citations
29. Viewing the Library as Citations and Tables
30. Citation style
31. Getting more fields for adding data
32. Organizing pdfs and renaming them
33. The HELP area – Updates, Back up and FAQs

Reference Management with Zotero

Before you use Zotero – 3 lessons

1. Introduction
2. Installing Zotero
3. Zotero web and desktop – overview

Populating Zotero - 6 lessons

1. Creating collections
2. Populating Zotero Manually
3. Adding existing PDFs
4. Using the Connector
5. Importing large results from PubMed
6. Importing large results from Cochrane Library

Browsing and Searching the Zotero Library - 2 lessons

1. Tags in Zotero
2. Searching the library

Managing Duplicates - 2 lessons

1. About Duplicate Records
2. Check for Duplicates feature

Adding Citations and References in an article – 4 lessons

1. Adding Citations and References
2. Editing Citations
3. Changing Styles
4. Exporting your paper for submission

Miscellaneous – various options in Zotero - 8 lessons

1. Elements in My Library
2. Groups
3. Recovering deleted items
4. PDFs and your Zotero space
5. Export options
6. Copying Citations & Bibliography
7. Citation styles
8. The HELP area – Updates, Back up and FAQs

Advanced PubMed Searching for Authoring Systematic Reviews

The Must Know Basics of Searching - 6 lessons

1. Four principles of searching-Principle I
2. Four principles of searching-Principle II
3. Four principles of searching-Principle III
4. Four principles of searching-Principle IV
5. Four principles exercises
6. Searching using Mesh
7. Truncating search terms

MeSH Terms – find all important ones you will need to use- 5 lessons

1. Understand The Mesh Results Page
2. Find the right MeSH term
3. MeSH - Using Subheadings
4. When your term is not in the MeSH database
5. Tricky MeSH Terms

Advanced Search Page - 3 lessons

1. Elements in the Advanced Search Page
2. Simple Search Topics
3. History Search Details

Detailed searching to author a systematic review- 9 lessons

1. Planning the search steps
2. Finding [tiab] terms
3. Tiab “phrases” or individual words?
4. Finding tiab terms from a Cochrane Review
5. Finding tiab terms using ChatGPT
6. Proximity searching
7. Carrying out the search
8. Downloading and Documenting the Search Strategy
9. Limitations
